Project Title: COUNT ON US (Hospital Appointments System)

COUNT ON US is a project, in which it targets the development of a database management system for Hospital appointments. This system not only benefits the Hospital with its detailed report on doctors but also the patients concerning their appointments, current and past medical records as well as the expenses required for the consultancy/surgery/medicine, for better understanding of the management procured by the system.

In this project, we will create a database management system that contains information regarding the Hospital appointments and it will include Tables such as Doctors, Patients, Medical Records and many more Tables.

Software requirements:

Operating System	: Windows 10
Programming Language	: SQL
Drivers	: Required Drives given in the system
Tools	: MySQL Server

Hardware Requirements:

Processor	: 10th Gen Intel Core i5 or higher
Memory	: 4GB RAM or higher
Any other devices	: Functional Monitor/Projector

Guide (In charge Faculty)

Names : Shwetha G N (GNS) and Monika Nag K J (MKJ)

Designation : Assistant Professors
Department of Information Science and Engineering
The National Institute of Engineering, Mysore
